ABOUT THIS FORMULA

A versatile everyday lyophilized vegan collagen complex. Formulated with a comprehensive blend of plant-fermented amino acids and skin-supportive botanical extracts — no animal products, no regulated compounds. Each 5 mL vial contains two daily doses. Use morning or evening by mixing a small measure with your preferred serum or cream base before application.

About the lyophilized form: The collagen precursor complex is freeze-dried into a lightweight powder. This format preserves potency without preservatives, extends shelf life, and activates fully upon contact with liquid. Mix with any water-based serum, essence, or light cream base immediately before applying to skin.

DOSING

Half the vial per use. Measure approx. 0.1%–1% of your serum volume per dose. Reseal securely after your first use and store in a cool, dry place for your second dose.

WHEN TO USE

Morning or evening — no timing restriction. Use the first half AM, second half PM, or both doses at the same time of day across two days.

FULL INGREDIENT PROFILE

AMINO ACID BLEND — COLLAGEN PRECURSORS

- Gly** **Glycine**
Primary structural amino acid in collagen. Supports skin elasticity and structural integrity.
Fermented plant source
- Pro** **L-Proline**
Essential for the triple-helix collagen structure. Supports skin firmness and tensile strength.
Fermented plant source
- Lys** **L-Lysine**
Supports collagen cross-linking, stabilization, and ceramide production for a healthy skin barrier.
Fermented plant source
- Arg** **Arginine**
Supports nitric oxide production, microcirculation, and nutrient delivery to skin cells. Fermented plant source
- Ala** **Alanine**
Structural component of collagen fibers. Contributes to skin hydration and cellular energy metabolism.
Fermented plant source

BOTANICAL EXTRACTS & NATURAL COFACTORS

- VitC** **Vitamin C (Ascorbic Acid)**
Necessary cofactor for collagen synthesis. Activates enzymes that stabilize the collagen triple helix. Potent antioxidant. Plant-derived
- Aloe** **Aloe Vera Extract**
Rich in polysaccharides. Supports skin hydration, soothes irritation, and promotes fibroblast activity.
Plant extract
- GTE** **Green Tea Extract (EGCG)**
Powerful antioxidant protecting collagen fibers from free radical degradation. Supports skin tone.
Plant extract
- RH** **Rosehip Extract**
Naturally rich in Vitamin C, beta-carotene, and essential fatty acids. Supports skin renewal and brightening. Plant extract
- HA** **Sodium Hyaluronate**
Low-molecular-weight hyaluronic acid salt. Attracts and retains moisture to support the environment for collagen synthesis. Fermentation-derived · Vegan
- Niac** **Niacinamide (Vitamin B3)**
Supports skin barrier function, reduces surface redness, and works synergistically with collagen precursors to improve skin texture. Plant-derived

HOW TO USE

- 1** Cleanse and tone your skin as normal.
- 2** **Measure** Open the vial and dispense approximately half the contents into the palm of your dose: your hand or a small clean mixing bowl.
- 3** **Reseal** after measuring to preserve the second dose. Store the resealed vial in a immediately cool, dry place.

- 4 Add your activator: Add a few drops of a water-based serum, essence, or light cream. Hyaluronic acid serum works exceptionally well.
- 5 Mix until dissolved: Blend with a fingertip or small spatula until smooth and gel-like.
- 6 Apply immediately to face and neck using upward strokes. Follow with moisturizer. Add SPF if using in the morning.

Disclaimer: Not for oral consumption. Do not ingest. For topical/external use only. Vials are unmarked — this info sheet serves as your product reference. Each vial contains 2 doses — reseal and store after first use. This is a complimentary personal-use sample and is not for resale. This product does not claim to treat, cure, diagnose, or prevent any illness, disease, or medical condition. Contains no animal products, controlled substances, prescription biologics, or regulated pharmaceutical compounds. Keep out of reach of children.

COMPLIANCE & SOURCING
